Dear Hiring Manager,

I have always had a passion for technology and throughout my life all of my biggest purchases have been “tech” based. I am intrigued as to the future of technology and development and in the near future I will be going to attend either the University of British Columbia, University of Alberta, University of Victoria, or Simon Fraser University for engineering/computer science related studies.

I have been employed by Cineplex Entertainment since I was 15 years old and through my time at Cineplex I have matured and evolved into a team leader and cast trainer. I have a desire to lead the team, I am well versed in problem solving concerning both guests and staff, and my work ethic and professionalism are reflected both by my Cineplex career and my schooling reports.

I have achieved First Class Honours, Straight A's, and Super G's on every reporting term since grade eight and I am a certified member of the Gifted Program. Outside of school I play soccer with West Coast Football Club, I obtain a black belt in Tae Kwon Do, and I take interest in coding and computer science.

Lastly, I have been named Cast Member of the Month three times in my three year Cineplex career with the awards coming in September 2014, September 2016, and January 2017.

I wholesomely believe that I would prove a great asset to your team and I look forward to speaking with you in the future.

Sincerely,

Duncan J. Pollard
